Before you paste anything into AI

DO

- ✓ Use it for public posts, newsletters and translations
- ✓ Check names, dates, figures and advice
- ✓ Say when AI did real work: “Created using AI tools”
- ✓ Use a tool your group approved that doesn't train on your data
- ✓ Name one person to answer AI questions

DON'T

- ✗ Paste names, contacts, donations, health or money details
- ✗ Post photos of people without their OK; children need a parent's written approval
- ✗ Publish AI advice on health, safety, law or animal care no expert has checked
- ✗ Let AI record or transcribe a meeting without everyone's OK

If in doubt, don't upload it.

General good practice from the AiGovOps Foundation; your group's own rules come first. Talk it through in five minutes: scan the front.
